Summary

I am a Front-End Developer with experience in UX and Co-Designing & Delivering the Curriculum of a Web Development Bootcamp. I value continuous learning, collaborative working, and user-centred environments and am eager to explore new technologies & frameworks with likeminded people. I am interested in using technology for social good.

Experience

Front-end Developer, Founders & Coders — Aug 2016 - Present

- * Built Wireframes, Prototypes and Web Applications and facilitated Client Workshops and Usability Tests in a fast-paced agile agency. See [portfolio](#) for project descriptions.
- * Facilitated regular Hackathons, Scrum-Mastered the Agile process for resulting MVPs and ran training workshops on User-centred Design for the Anna Freud Centre.
- * Facilitated Design Sprints for CAST's 2016 Digital Fellowship programme, as well as for the Anna Freud Centre and NHS Digital.

UX Researcher, Outlandish — Jun 2017 - Nov 2017

- * User researched applications ideas, diagnosed the growth potential, and provided strategic guidance to a young network of digital cooperatives called CoTech.
- * Planned, conducted and reported findings of research utilising secondary research, contextual enquiry, interviews, surveys, affinity mapping, and user testing methods.

Programme Facilitator, Founders & Coders — Nov 2016 - Jun 2017

- * Service design and business development role delivering and improving the programme of one of London's top web development bootcamps.
- * Co-authored, maintained, and main contributor to the community's open-source master playbook & curriculum, used to build new campuses in Nazareth & Gaza.
- * Co-Designed, user tested and iteratively improved workshops. Designed weeks of material and mentored students on node.js, back-end frameworks, and UX Design.
- * Facilitated curriculum planning & weekly review sessions with mentors & students. Converted feedback into actionable improvements to the student experience.

Full-stack Web Development, Founders & Coders — May 2016 - Aug 2016

- * 16 week intensive, peer-led and project-based full-stack Javascript development course. Worked on a total of 9 team projects.
- * Helped to run the next course by designing workshops, improving curriculum materials and mentoring the subsequent cohort of students.

References

I have gained work experience in different temporary administrative roles to fund my travelling and transition into software development. References available upon request.
