Debugging (chrome tools)
Deployment (heroku, cms)
Build tools (webpack)
Single-page Apps (react.js)
Progressive Web Apps
Templating (handlebars.js)

User Experience

User Research
Usability Testing
Prototyping (inVision)
Wireframes (figma)
Cross-team Collaboration
Strong Communication

See LinkedIn or my
portfolio for more.

Summary

I am a front-end developer with multidisciplinary experience and strong interests in UX. I value continuous learning, collaborative working, and user-centred environments and am eager to explore new technologies with likeminded people. I am interested in using technology to empower people to lead happier, healthier, and safer lives.

Experience

UX Researcher, Outlandish — Jun 2017 - Nov 2017

* User researched applications ideas, diagnosed the growth potential, and provided strategic guidance to a young network of digital cooperatives called CoTech.

* Planned, conducted and reported findings of research utilising secondary research, contextual enquiry, interviews, surveys, affinity mapping, and user testing methods.

Service Designer, Founders & Coders — Nov 2016 - Jun 2017

* Leadership and business development role delivering and improving the programme of one of London's top web development bootcamps.

* Co-authored, maintained, and main contributor to the community's open-source web development curriculum, used in campuses in London, Nazareth & Gaza.

* Co-Designed, user tested and iteratively improved workshops. Mentored students on node.js, back-end frameworks, and UX Design.

* Facilitated curriculum planning & weekly review sessions with mentors & students. Converted feedback into actionable improvements to the student experience.

Front-end Developer, Founders & Coders — Aug 2016 - Jun 2017

* Built Wireframes, Prototypes and Web Applications and facilitated Client Workshops and Usability Tests in an agency environment. See portfolio for description of projects.

* Facilitated regular Hackathons, Scrum-Mastered the Agile process for resulting products and ran training workshops on Design Thinking for the Anna Freud Centre.

* Facilitated design sprints for CAST's 2016 Digital Fellowship programme, as well as for the Anna Freud Centre and NHS Digital.

Full-stack Web Development, Founders & Coders — May 2016 - Aug 2016

* 16 week intensive, peer-led and project-based full-stack Javascript web development course. Worked on a total of 9 team projects.

* Helped to run the next course by designing workshops, improving curriculum materials and mentoring the subsequent cohort of students.

References

I have gained work experience in different temporary administrative roles to fund my travelling and transition into software development. References available upon request.
